Data  
Table  
Graph  
Explanation  
Conclusion  
Idea  
Proposal  
Solution  
Trivial  
Significant  
Prediction

### SUBJECTS:

This week we will concentrate on the scientific method, science process skills, and lab safety rules. The students have copies of words & definition, lab rules and a list of intricate science process skills in their individual notebooks. The skills important to success in science are observation, inferring, classifying, communication, prediction, interpreting data, using variables, and hypothesizing.
