

5th GRADE

VOCABULARY:

Hypothesis
Variable
Experimental Controls
Observation
Inference
Measurement
Simple Tools
Technology
Data
Table
Graph
Explanation
Conclusion
Idea
Proposal
Solution
Trivial
Significant
Prediction
Validity
Reliability

Sanders Super Science

NOTES FROM TEACHER:

Please remember to talk to students about classroom behavior/s. We have a district, school, and classroom behavior plan which is vital to the success of our school and district.

SUBJECTS:

This week we will concentrate on the scientific method, science process skills, and lab safety rules. The students have copies of words & definition, lab rules and a list of intricate science process skills in their individual notebooks. The skills important to success in science are observation, inferring, classifying, communication, prediction, interpreting data, using variables, and hypothesizing. Parents, please remember the Total Solar Eclipse and share that experience with your student. This is a rare occasion and should be shared.
